

Aqua-Quip releases the innovative Evo2 LED Pool Lighting System.

Modern Design Compact Light & Quick Connect Cable.

Allows cable and plug assembly to be wound up inside the housing whilst the pool is being built. Pool light can be stored in a safe location. When the pool is ready to be filled, simply screw the plug kit onto the rear of the light. No tools necessary.

Evo2 Lights for Concrete Pools are supplied with the cable separated from the pool light to speed up installation, packaged in one box. The plug kit on the end of the cable is factory-fitted with a removable protective cover.

Evo2 Lights for Fibreglass/Vinyl Pools are supplied with the cable connected to the pool light. The pool light is supplied fitted into the fibreglass/vinyl housing. The fibreglass/vinyl housing is factory fitted with 1 metre of cable wound up inside. Ready to install.

New Evo2 Compact Concrete Housing.

The Concrete Housing has been reduced in length to 130mm. It is the shortest on the market, making it builder-friendly for the fully formed pools. Housing now features factory-fitted conduit fitting on top that accepts 20mm conduit or 25mm conduit fitting. Rear conduit exit point accepts 20mm conduit fitting. A simple-to-use Internal cable gland now provided as standard, preventing water from entering the conduit. Specially designed so that no tools are required to tighten it, it's easy to simply tighten up the gland nut with your fingers.

New Plaster Cap.

Pushes snugly into adjustable eyeball dress ring to protect cable and quick-connect plug whilst pool is under construction. Allows pebble-creeper to run trowel over the top of plaster cap, ensuring pool interior finishes absolutely flush with dress ring. Evo2 then sits perfectly flush.

Super Bright Fixed Colour LEDs.

Long lasting, energy efficient LED Array is Australian Made. Fixed colour LED's available in White, Blue and Green. Features over-temperature cut out and unique ridged thermal management system. Voltage transient clamping.

New Spectrum III LED

Spectrum III is the name of the newly developed and highly advanced colour changing LED Array that fits into Evo2. Spectrum III is brighter than previous Spectrum models, is user-programmable, has a memory-save feature, robust synchronisation software and features the unique Colour Palette Selection Mode. User can program their lights to start up in their favourite colour (choose one of 50) or start up in a variety of flash or scroll modes. See attached programming instructions.

Unique Duo-Focus Lens.

Each pool is different. Some pools require the beam of illumination to be Wide-Angled, some need to be Focused. Pre-order Evo2 from Aqua-Quip in the configuration of your choice.

Retro-Fit Options.

Evo2 LED Replacement Light Kits are available to upgrade any previous Aqua-Star Halogen or Spectrum Flush Mounted Pool Light. Evo2 Replacement Light Kits are supplied with the LED light and the Evo2 Quick-Connect Plug Kit that simply connects up to the original Aqua-Star cable. Specify if ordering for Concrete or Fibreglass/Vinyl.

Custom LED Programming.

Spectrum III can be factory-programmed to a theme of your choice! Building a fully tiled pink and purple pool? Want some fancy Hot Pink and Purple LED effects built into the LED array? Want your beautifully illuminated blue pool to look like it got hit by lightning? Pretty much any theme, colour or timing feature can be factory-programmed. Contact Aqua-Quip for full details.

Self Locating Feature.

Evo2 features a user-friendly locating device, so that the rear of Evo2 self-locates into the adjustable dress ring. Making installation simpler.

Conduit Cable Gland.

A cable gland is available for customers wishing to terminate 20mm conduit. Supplied with three colour-coded seals to allow for cable sizes from .75mm² to 4mm². Ideal for cable entry into transformer.

Stainless Steel Trim Rings.

By far the best looking stainless steel trim rings on the market. The mirror-polished 316 Stainless Steel Trim Ring Kits fit elegantly over the Evo2 light.

Aqua-Star Halogen.

Whilst the whole world is moving rapidly toward energy-saving products, such as LED Lighting, Aqua-Star halogen lights have been a popular choice for many, and these are still available. Supplied with the original longer housing.
